**FOR A FAIR, REALISTIC, GREEN, SECURE AND
HEALTIER ENERGY FUTURE**

SOME OF TESPAM'S TRADEMARKS

ABOUT US

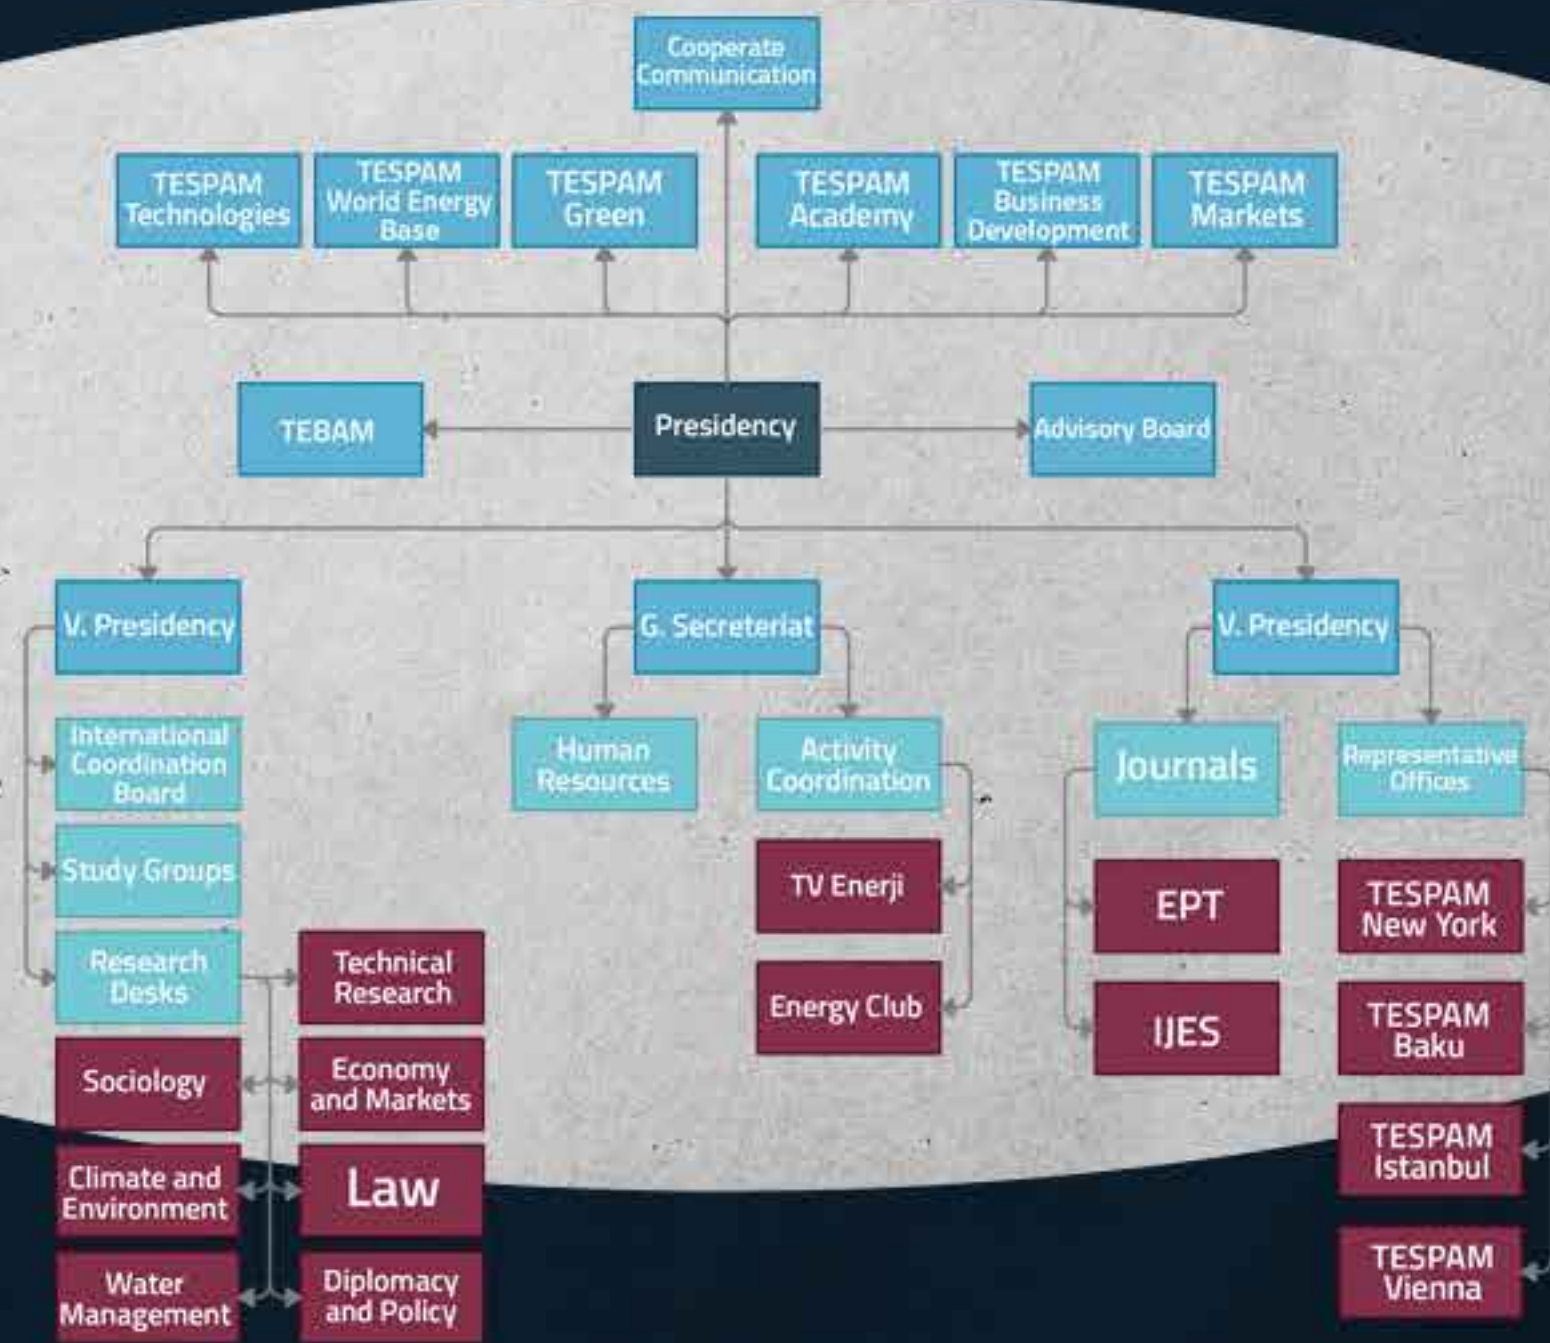

TESPAM is a think tank based in Ankara, with representations in important cities such as Vienna, New York, Baku and Istanbul. TESPAM, which produces comprehensive analyzes in all fields of energy, thanks to its success in long-term projections, has become an institution that is admired on a global scale and desired to work with.

Realizing the importance of climate change targets, green transition, protection of weak societies and support for gender equity, TESPAM carries out multidimensional studies with its international partners in different countries. Within this regard, TESPAM endeavors to develop a fairer and more applicable global approach.

Contributing to the UN's sustainable development goals with its multidisciplinary working teams and research groups, TESPAM also supports technological entrepreneurship, new ideas and multinational collaborations with the affiliates it coordinates.

In this regard, TESPAM aims to:

- Support international trade with "TESPAM Business Development",
- Coordinate practices that will contribute to green transition and efficiency with "TESPAM Green",
- Disseminate of occupational safety and smart automation systems with "TESPAM Technology",
- Develop educational opportunities with "TESPAM Academy",
- Help to eliminate the risks that may occur in the value chains by providing a more understandable reading of price dynamics with "TESPAM Markets",
- Create a more integrated awareness environment for the entire international public with the "TESPAM World Energy Base".

Through this vision and activities, everyone who wants to support TESPAM for the development of humanity, global peace and justice, equality and sustainable – economic – clean energy supply processes are always invited and welcome to our roundtable working groups.
